Presenting TC-X Double Diaphragm Pumps

YTS has been producing a large range of Air Operated Double Diaphragm Pumps in Japan since 1978 and now offers a huge line-up of standard & customized pumps available in many different sizes & materials.

All TC-X pumps are specifically designed to be used in process type liquid transfer applications and offer various engineered design features enabling efficient high performance liquid transfer & high operational reliability. They can be easily and quickly serviced and maintained even without pulling the pump from the process line. All serviceable wear components are modular and fully replaceable offering simple low cost replacement over a long lifetime of use.

Due to their engineered design, and due to the specific utilization of modern high tech materials, all TC-X pumps can be operated without the need for Air Line Oil or Grease Lubricants. They therefore offer safe, clean zero emissions pump operation, protecting people, processes and work environments from dangerous airborne vaporized contaminants.

The new generation Looped C[®] Spool and the third generation Coil-Spring Air Valve offer much improved pumping performance, air consumption, operational reliability & reduced maintenance. Pumps fitted with the new patent pending Air EcoRing offer on average, 16% better air consumption figures without any negative effects to overall pumping performance.

All pumps incorporate independent high performance Pilot Valves for unrivalled reliability and high speed short stroke operation. TC-X pumps utilize large diameter air porting and will resist stalling and resist freezing in nearly all conditions. They have leak resistant design features such as; fully bolted construction, machined liquid mating surfaces and registered fit body assembly. All TC-X pumps are fully torqued and rigorously tested prior to shipment.

Diaphragm Pump Capabilities

Dry Run

Diaphragm Pumps can Run Dry for extended periods with no damage to the pumps moving parts. Also when running dry the pump will not overheat.

- #1. Dry running pumps will speed up and will consume higher amounts of air.
- #2. Dry Running can negatively affect the life of PTFE Diaphragms.

Transfer Solids

Due to their unique design, liquid slurries as well as large sized solids such as beads, stones etc. can be pumped with ease.

- #1 the allowable solid size is different for each pump and is determined by the ball valve dimensions.
- #2 Abrasive slurries can be pumped however care should be taken that the wetted materials of construction are abrasion resistant.

Variable Flow Rates and Discharge Pressure

By adjusting either the air regulator or a liquid discharge valve, it's possible to operate the pump anywhere between 0 liters per minute to full capacity. Liquid discharge pressure can be adjusted from less than 1 bar up to 8.4 bars, on some larger pumps.

Dead Head

A Diaphragm Pump can run against a semi closed or fully closed liquid discharge valve "Dead Head" without damage or wear to the pump. Therefore the Discharge Line may be closed fully at any time and even closed repeatedly. There will be no Power consumed, no Temperature increase and no damage to the pump, it will simply stop.

- #1 Discharge Pressure cannot exceed Air Pressure so there is no need for a Pressure Relief System.

Self-priming

Diaphragm Pumps can operate dry and they also generate relatively high Vacuum Pressure, thus allowing the pump to Self-Prime.

- #1 There is no need to use special mechanisms, equipment or special startup procedures to prime the pump.
- #2 Pumps can operate both wet and dry and can self-prime repeatedly without damage.

Safely Transfer Flammable and Hazardous materials

Diaphragm pumps are powered by compressed air and do not have any kind of electrical connections. They cannot overheat and they are cooled naturally during operation by the supply of compressed air. When correctly earthed, they are considered safe to use when pumping flammable liquids or when used in Explosive Environments.

Made in Japan

All TC-X Pumps are designed engineered and manufactured in Japan. Every pump is torqued and tested prior to dispatch to ensure correct performance and optimal leak proof operation.

The Looped C[®] Spool

The new Looped C[®] Spool offers improved switching reliability and longer parts life expectancy. The Looped C[®] Spool has fully replaceable Seal Rings and a new lightweight Shaft. The Sleeve has been redesigned offering increased wear resistance and increased surface smoothness. Spool & Sleeve are both outside accessible and completely Non-lubricated.

The Air EcoRing

When installed can decrease actual Air Volume requirements by up to 25% with no decrease in liquid flow rates. (Compared to an old equivalent model pump. (Average 16%).

High Flow Ball Guide

The revolutionary Patented High Flow Ball Guide is designed to achieve very high flow rates (up to 220 l/min) and also allows for the passage of very large solids (up to 6.5mm). Fitted as standard to all 3/4" & 1" metallic pumps, the High Flow Ball Guide is fully modular & replaceable helping to reduce the overall long term costs of service & repair.

TC-X030 Pump Series (E/L Not Required)

Diaphragm Pumps with 1/4" Connections
 8 L/min Max Flow Rate.
 An Export Licence is not required.

Some Models

TC-X030V

TC-X030HT

Type 030 Series		
Model Code	030 V T	030 H T
Max Flow Rate	8 L/min	
Connection Type	Thread	
Connection Size	Air Supply	1/4"
	Air Exhaust	3/8"
	Liquid	1/4" ※Side Port
Check Valve Type	Flat	
Max Solid Size	0mm	
Supply Air Pressure Range	0.2 ~ 0.7MPa	0.2 ~ 0.5MPa
Materials	Wetted Body	CFPVDF
	Air Motor	PPS
	Diaphragm	PTFE

TC-X050 Pump Series

Diaphragm Pumps with 1/4" Connections
11.5 L/min Max Flow Rate.

Some Models

TC-X050P

TC-X050A

Optional MultiPort Models.

Type 050 Series		
Model Code	050 P · V T	050 A · S T
Max Flow Rate	11.5 L/min	
Connection Type	Thread	
Connection Size	Air Supply	1/4"
	Air Exhaust	3/8"
	Liquid	1/4" ※ Side Port (Multiport Option)
Check Valve Type	Flat	
Max Solid Size	0mm	
Supply Air Pressure Range	0.2 ~ 0.7MPa	
Materials	Wetted Body	PP, CFPVDF (PPG, CFPP) Aluminium, SUS
	Air Motor	PPS
	Diaphragm	PTFE

TC-X101 Pump Series

Diaphragm Pumps with 3/8" Connections
23 L/min Max Flow Rate.

Some Models

TC-X101A

TC-X101P

Optional 1/2" Connections.

Type 101 Series		
Model Code	101 P □	101 A · S □
Max Flow Rate	18 L/min	23 L/min
Connection Type	Thread	
Connection Size	Air Supply	1/4"
	Air Exhaust	3/8"
	Liquid	1/4" (1/2" Option)※ Multiport
Check Valve Type	Ball	
Max Solid Size	1mm or less	
Supply Air Pressure Range	0.2 ~ 0.7MPa	
Materials	Wetted Body	PP (PPG, CFPP) Aluminium, SUS
	Air Motor	Aluminium
	Diaphragm	CR, NBR, PTFE, TPEE, TPO

TC-X152 Pump Series

Diaphragm Pumps with 1/2" Connections
60 L/min Max Flow Rate.

Some Models

TC-X152P

TC-X152A

Optional Conductive PP
Air Motor Section

Type 152 Series		
Model Code	152 P · V □	152 A · S □
Max Flow Rate	56 L/min	60 L/min
Connection Type	Thread	
Connection Size	Air Supply	1/4"
	Air Exhaust	3/8"
	Liquid	1/2" ※ Multiport
Check Valve Type	Flat	Ball
Max Solid Size	0mm	1mm or less
Supply Air Pressure Range	0.2 ~ 0.7MPa	
Materials	Wetted Body	PP, CFPVDF (CFPP) Aluminium, SUS
	Air Motor	PPG (CFPP)
	Diaphragm	CR, NBR, PTFE, TPEE, TPO

TC-X200 Plastic / Metallic Pump Series

Diaphragm Pumps with 3/4" Connections
200 L/min Max Flow Rate.

Some Models

TC-X200A

TC-X200G□

Optional Aluminium
Air Motor Section

Optional Conductive PP

Flap Valve Solids Transfer Pump Series

Diaphragm Pumps with 2" Connections
Up to 600 L/min Max Flow rate.

New 2" Flap Valve Solids Transfer Pumps for the Transfer of Large Solid Laden Liquids Up to 40mm in size.

Typically operated in water evacuation, process and waste type applications, Flap Valve Pumps utilize a reversed top down liquid flow path and with 4 large heavy duty flap valves to facilitate the transfer of liquids containing large sized solids. For ease of use & ease of maintenance, each pump is fitted with 4 externally accessible inspection panels allowing for each individual Flap Valve to be inspected cleaned or replaced simply and easily without having to remove the pump for service. This special externally accessible design also allows for the inspection & cleaning of the pumps diaphragms and other moving parts.

Fitted with the heavy duty Mechanical Coil-Spring Air Motor, each pump is designed for high performance operation, extreme reliability & extended parts life expectancy. They can operate anywhere from very low to very high air pressures with extremely efficient air consumption ratings. These pumps are particularly suited to frequent start stop, Dead Head & high backpressure type applications and can easily handle High Heads & very Long Discharge Lines with ease.

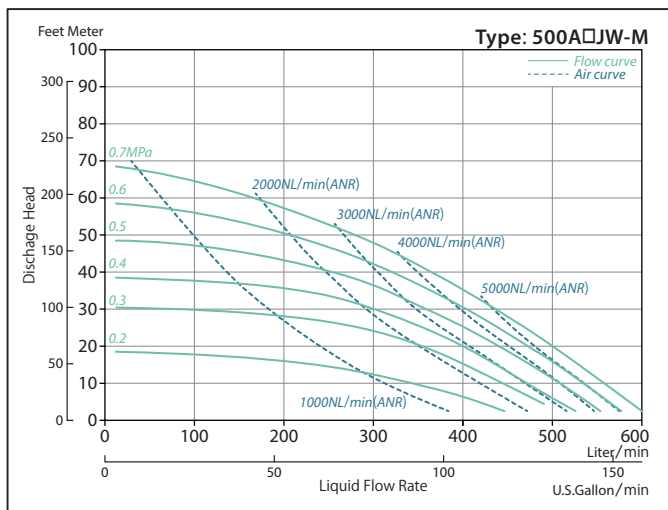

TC-X500A□JW-M

Externally Accessible Flap Valves.

Special outside accessible design.
Inspect, Clean and Service in Place.
Maintain In-line.
No need to pull the pump from service.

Flap Valve Solids Transfer Pump Series		
Model Code	500 A □ W	
Max Flow Rate	600 L/min	
Connection Type	Flange	
Connections size	Air Supply	3/4"
	Air Exhaust	3/4" ※2 Ports
	Liquid	50A ※Center Port
Check Valve Type	Flap	
Max Solid Size	Spherical Shape : Φ30mm or less Stick Shape : Φ15mm×45mm or less	
Supply Air Pressure Range	0.1 ~ 0.7MPa	
Materials	Wetted Body	Aluminium
	Air Motor	Aluminium
	Diaphragm	NBR, TPO

Specialty Pump Models

Drum Pumps

Air Powered Drum Syphon Double Diaphragm Pumps available in a wide range of sizes and materials. Suitable for pumping directly from 200 litre Barrels.

For the safe clean and efficient transfer of all kinds of liquids including corrosive chemicals, oils, lubricants, waste liquids, solvents and fuels. Can be used to pump flammable liquids and in explosive environments. Available with 1/4" 3/8" 1/2" 3/4" and 1" Liquid connections. Available Materials: PP, PPG, CFPP, CFPVDF, PTFE, CFPTFE, Aluminium, SUS, FDA & Electro Polished SUS. Max Flow Rate: 220 L/min. Max Slurry Size: 6.5mm on a 1" pump.

Drum Bung Pipe Adapter (SUS)

E Series Pumps

Compressed air powered AODD pumps with an electrically actuated air switching mechanism. E Series electric double diaphragm pumps used in critical process type applications and can be fully integrated into control systems and process machinery while still offering all the major benefits of an AODD pump.

Used for liquid transfer, metering, batching, or cycle speed control. Can also be connected to warning devices to monitor pump stroke rate or pump stoppages etc.

E Series Pumps have extremely reliable "non stall" operation in all operating conditions. Utilizing electric spool actuation & stroke sensor for full (intelligent) pump controllability. Very low start up pressure capability. More accurate liquid flow rates and lower liquid pulsation. Increased life expectancy of the pumps moving parts and generally lower maintenance requirements overall. The E type design allows for quieter operation & lower air consumption and is a much more reliable and efficient way to transfer liquids.

TC-X050HT-EX

1 1/2" CFPVDF E Type Pump (Flanged)
380 L/min Max Flow Rate

Specialty Pump Models

Conductive Polypropylene Pumps

Electrically Conductive Polypropylene Double Diaphragm Pumps used for the safe transfer of flammable chemicals or for use in explosive environments.

Carbon filled Polypropylene used to manufacture all major body components including both the Liquid and Air Side on the pump. Available with 1/4" 1/2" & 1" Connections. Offering high Chemical Resistance and a fully Bolted Design with inbuilt engineering features designed to resist material creep so reducing the chance of leaks forming over time.

TC-X250C□J-X

Powder Transfer Pumps

Specially Designed Powder Pumps to syphon and transfer very fine, dry, bulk powders effectively throughout a process and help create a safe, efficient and dust free environment. Powder Transfer Pumps can eliminate the need for intensive manual labour, heavy lifting or mechanical Augers & Conveyors.

To operate correctly, the Powder must be completely dry and typically free flowing. Conveying distance will depend entirely on the type of powder, its weight, size, shape and bulk density. Typically powders such as Pigments, Activated Carbon, Powder Coatings, Carbon Black, Fumed Silica, Talc, Toners & Powdered Plastics can all be transferred successfully. However it is always recommended that a trial is firstly carried out to determine the pump-ability of a certain type of powder.

Powder Pumps are available in the following Sizes & Materials

3/4" 1" 1 1/2" 2" & 3" Aluminium or Stainless Steel. Shipped with factory fitted Compressed Air Induction System. The standard model utilizes 4 inlets however custom models are available. Many more options and accessories are also available. # please consult YTS for more information about pumping powders and Powder Pumps.

Compressed Air Induction System.

Power Pumps are fitted with an Air Induction System to fluidize the powder and help stop clumping and sticking. Pre Fluidization before operating the pump will also help reduce the chance of pump damage caused by settled and compacted powders.

TC-X250A□-X
1" Powder Pump.

TC-X500A□J-X

Specialty Pump Models

High Pressure Pumps

High Pressure Double Diaphragm Pumps for applications where high liquid discharge pressures are required to overcome system requirements.

Often utilized in filter press type applications and can easily handle High Heads, very Long Discharge Lines and Frequent Dead Head type processes. Pressure output is roughly doubled however the flow rate is roughly halved. 2:1 discharge pressure ratio is achieved by utilizing twice the surface area (driving both diaphragms) to double the discharge pressure output. High Pressure 2:1 pumps are available with 3/4" 1" 1 1/2" 2" & 3" connections with aluminium stainless steel and cast iron construction.

TC-X500S □ J-X
2" High Pressure SUS Pump
365 L/min Max Flow Rate

FDA Grade Sanitary Diaphragm Pumps

FDA Grade Sanitary Double Diaphragm Pumps for Food, Beverage, Pharmaceutical, Cosmetics & Chemical applications where 3A, USDA or EHEDG standards are not required.

Available in all sizes 1/4" through to 3" in Stainless Steel. Manufactured from FDA & Halal Compliant Materials. 316 Electro Polished Stainless Steel Housings & Hardware with Oversized Sanitary Flange Connections Welded Directly to the Pump. Electro Polished Inside and Out.

ISO Type Sanitary Flanges Shipped as Standard. Optional 3A Type Connections are Also Available.

FDA Compliant Drum Pumps & FDA Pulsation Dampeners are also available.

TC-X500S □ F-MX
FDA Type Electro Polished SUS Pump.
2 1/2" Sanitary Flange Connections.
500 L/min Max Flow Rate. (PTFE Diaphragms)
8mm Max Solids Size.

TC-X250S □ F-X
FDA Type Electro Polished HD SUS Pump.
1 1/2" Sanitary Flange Connections.
190 L/min Max Flow Rate. (PTFE Diaphragms)
6.5mm Max Solids Size.

Sanitary Flange Connections

Shipped as standard on all FDA compliant pumps. Welded and Oversized Stainless Steel. Available in either Standard ISO or optional 3A sizes.

Suitable Sanitary Type Clamp fittings and gaskets sold separately

Common Accessories & Options

Liquid Pulsation Dampeners

A comprehensive range of high Performance Liquid Pulsation Dampeners in various sizes and Materials. Reduce Liquid Pulsation by up to 95%.

Pulsation Surge Tanks

Cost effective & convenient method of suppressing liquid pulsation. Able to transfer liquid slurries and large solids without decreasing flow rates. Available in SUS316 with threaded connections for 3/8", 1/2" and 1" metallic pumps.

Air Filter Regulators

Built in moisture and particulate removal of up to 5 micron. Analogue type pressure gauge with locking function. Manual drain system. Provides optimal pump control and helps improve compressed air efficiency.

Specialty Diaphragm Options

A full range of high performance Pump Diaphragms available in all sizes and materials. Optional TPO rubber Back up Diaphragms. One Up® Brand Specialty Diaphragms. Bonded Rubber PTFE Diaphragms. New One piece solid type PTFE diaphragms are also available.

Stroke Counter Option

Pneumatically actuated mechanical stroke counter. Non electrical. Fitted to the pump via an air hose. Used for measuring stroke life of pump or diaphragms. Can be used to measure and calculate liquid volume over time.

PTFE Coatings

PTFE Coated Air motor Assembly for increased chemical resistance. Used to protect air motor assembly from ruptured Diaphragms, chemical spills or for use in corrosive environments.

Common Accessories & Options

Automatic Liquid Level Controller

The HLC Automatic Liquid Level Controller is a pneumatically controlled system designed to automatically start and stop an AODD Pump when the liquid level within a tank reaches a predetermined Hi or Low level. The HLC is available in 4 different models.

Anti-Stall Accessories

Variety of accessories to solve stall problems are available.

Conductive Liquid Leak Sensor Kit

Automatically detect leaks or diaphragm ruptures. Automatically cuts air supply, triggers cut of valves or sounds warning alarms etc.

Check Ball Valve & Seat Options

The materials of the check ball valves and seats can be changed for specific applications when transferring fluids that have a high specific gravity, are highly viscous and / or when increased chemical resistance is required.

Tools

A full range of standard & specialty pump service tools are available for all model pumps.

Spare Parts & Pump Service Kits

A full Range of Spare Parts and Pump Service Kits are available for all new and old model pumps.

Fully Engineered Diaphragm Pumps

High Flow Rates

Up to 730 L/min on this 2" Pump.

Compact & Robust

With its Compact Size & Robust Construction, this High Performance Pump is Designed for use in any Application.

Fully Bolted Construction

Pumps Bolted and Fully Torqued prior to shipment. Easy to Assemble and Disassemble.

Machined Mating Surfaces

Reducing any Chance of Leaks.

Outside Accessible Air Motor

Simple and Fast to Service.

Extremely Reliable Operation

New Coil Spring Air Motor for High Performance Operation. Low Start Up Pressure and High Head Discharge.

Non-Lubricated Air Motor

No Oil or Grease Required for normal operation.

Efficient Air Consumption

Designed to operate Extremely Efficiently and also reduce air leakage or loss in all operating conditions.

Non Stall Operation

Will operate from Very Low to Very High Air Pressure using State of the Art materials. This Non-Lubricated Air Motor has been engineered to offer Extremely Reliable switching operation.

Common Footprint & Dimensions

Ports and Foot Dimensions match many other Brand Pumps making it easy to replace another pump without changing the pipe fittings.

Patent Pending

Designed and Manufactured in Japan with various Patents Pending.

Looped C[®] Air Spool.

New Generation Mechanically Assisted Non-Centering Spool

100% Non-Lubricated.
Increased Performance.
Improved Reliability.
Extended Life expectancy.
Outside Accessible.
Modern Materials of Construction.
Common "Drop-in" sizes.

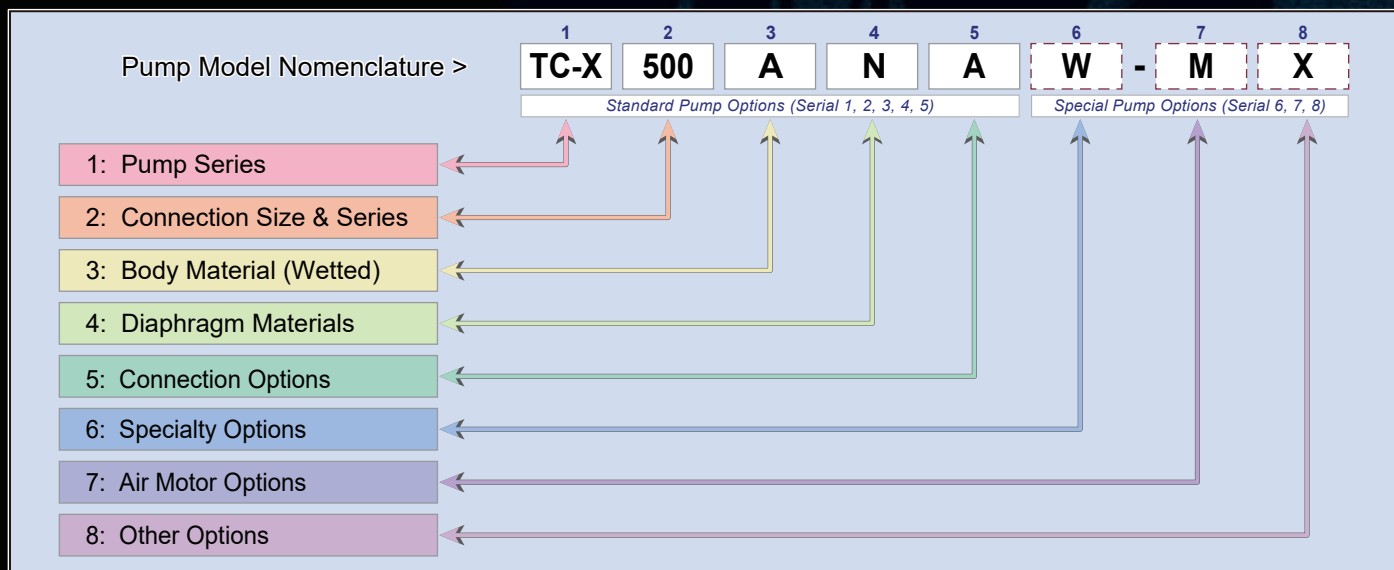

Mechanical Air Spool.

3rd Generation Heavy Duty Mechanically Assisted Non-Centering Air Spool

For tough & demanding applications.
Will resist spool stalling & freezing in nearly all operating conditions.
Superior pumping performance.
Extreme reliability.
Serviceability & Longevity.
100% Non-Lubricated.
Outside Accessible.

TC-X Pump Model Code Nomenclature

Viton® is a registered trademark of DuPont Performance Elastomers.

Notes: Options, Variations, Add On's and Accessories may not be available for all models sizes or materials. YTS stocks a full range of Pumps Parts and Accessories (Standard Stocked Items). Other models are classified as Order-only and stock may not be available. For information about the Line Up, Prices, Availability and Delivery please contact YTS or your Pump Distributor directly.

Note: factors affecting a pumps stated liquid flow rate, suction lift & solids handling capabilities include but are not limited to: pump size, diaphragm, ball valve & ball seat, type & materials of construction, air inlet pressure & air flow capability, liquid viscosity, specific gravity, slurry content, ambient & liquid temperature, liquid inlet & liquid outlet width, piping type, piping length & overall piping configuration.

Notes:

Products & specifications contained within this catalogue may be changed without notice. Pumps listed are available in various and materials. For each application please take extreme care with pump choice and always consider factors such as chemical compatibility, solids size, abrasion resistance, temperature of the liquid, temperature of the surrounding atmosphere, airline or liquid line pressure etc. Always refer to MSDS and chemical compatibility charts or for more information about chemical compatibility. For more information on choosing the correct pump, please consult with your distributor or contact YTS directly. Note that products contained may be subject to international trade restrictions or embargoes and may require an export permit from the Japan Ministry of Economy and Industry (METI) prior to dispatch. For more information regarding international export control regulations please contact your distributor or YTS directly. For information regarding re-export please contact your local authorities directly. For information regarding CE & ATEX refer to the CE and ATEX certification available separately. Countries where YTS patents were applied : Japan, China, Korea, USA, Italy, Denmark, France, Germany, Netherlands, Sweden, and England.
